

trees

id	year	dbh
1	2020	1.9
1	2021	2.1
2	2020	5.2
2	2021	5.5
3	2021	0.5

```
summarize(trees,  
  dbh_mean = mean(dbh),  
  dbh_sd = sd(dbh))
```

The diagram illustrates the process of summarizing data. Two curved arrows originate from the 'trees' table. The first arrow starts at the first row (id=1, year=2020, dbh=1.9) and points to the 'dbh_mean' cell of the summary table. The second arrow starts at the last row (id=3, year=2021, dbh=0.5) and also points to the 'dbh_mean' cell. This indicates that the 'mean' function is applied across all rows of the 'dbh' column.

dbh_mean	dbh_sd
3.04	2.2
